Inflation is a measure of the achievement of the national economy and the stability of the prices of goods. The achievement of expected inflation is low and stable, so the price of goods is not high volatile. The achievement of low inflation is one of the problems facing the government. The purpose of this study was to determine the great persistence of Indonesia period January 2006 until December 2015.

The data used in this study using secondary data time series and panel data published from the Central Statistics Agency (BPS), ie monthly inflation (month-to-month) were measured using the Consumer Price Index (CPI) Indonesia using data January 2010 until December 2015.

The highest commodity contributed by Housing, Water, Electricity, Gas and Fuels (0.261578); Foodstuffs (0.235006), Transport, Communications, and Financial Services (0.172028); Food, Beverages, Cigarettes and Tobacco (0.164849); Clothing (0.069148); Education, Recreation, and Sports (0.061601); and Health (0.042684).

Keywords: Inflation, CPI, Persistence
